

PAT 100

Flexible interconnecting module

SCOPE OF PAT 100:

- ▶ The PAT 100 interconnecting module allows a flexible – even physically separated – assembly of modules. The PAT 100 extends the CAB backplane bus.
- ▶ Using a RJ45 cable, two rows within a fuse box can be interconnected.
- ▶ Alternatively, an IDC connector can be used to install modules within distances up to 100 m.

Flexible interconnecting module

TECHNICAL SPECIFICATION PAT 100

| | |
|-----------------------------|--|
| LSA | 1x cut-and-clamp connector |
| RJ45 | 1x RJ45 socket |
| Housing Shape | REG (acc. to DIN 43880) |
| Housing Width | 1 PU |
| Operating Conditions | Ambient temperature during operation: 0°C ... +50°C Storage temperature: -25°C ... +60°C |
| Protection Rating | IP20 |
