

Focus on: Switchgear construction

Our workshop team will build custom control systems for you in a 4,500 square meters (48,000 square feet) production facility. From the individual terminal box up to the high-tech control system, you get everything from a single source.

We produce more than 15,000 switchgear device combinations for our customers per year in our Wetter plant - regardless of whether an individual item or high-volume production.

Fast and flexible thanks to in-house cable termination

Our in-house cable termination manufactures single strands and cable harnesses fast, inexpensively and very flexibly. Thus, even the smallest batches and single-piece manufacturing can easily be implemented in the switchgear sector.

Our carefree-all-around package

- Construction and documentation, e. g. with EPLAN
- Switchgear construction, complete system integration
- Complete module, component and device installation
- Parameter setting and programming (e. g. PLC, inverter, etc.)
- Design and construction of testing facilities
- Electrical testing on testing facilities provided by the customer or self-provided testing facilities
- 100 percent functional test of control systems
- On-site facility assembly
- Start-up and service
- Shipping all the way to the end customer
- Start-up, maintenance and service (worldwide)

Your advantages

- **Quality:** Our many years of experience and the 100-percent final inspection ensure the quality of your products.
- **Complete range of products:** We supply everything from a single source – from the idea up to start of production. Using TQ products (embedded modules, industry PCs) brings further cost and time advantages.
- **Know-how:** Our many years of know-how ensure maximum reliability.
- **Pooling effect:** High production output allows for lower purchase prices.
- **Close proximity:** Contact persons near you guarantee the best service.
