General:

Engineering Order EOMD-011 covers the installation of a Dittel Avionik KTR2. This VHF Airborne Transceiver provides the usual frequency range from 118,000 to 136,975 MHz with 8,33 and 25 kHz channel spacing in a 57mm standard panel cut-out format.

Limitations:

No change to the basic flight manual.

Emergency Procedures:

No change to the basic flight manual.

Normal Procedures:

No change to the basic flight manual. Relate to the applicable KTR2 VFR Communication Transceiver Operation and Installation Manual , Doc. No. DE-3000-800100e for System features and operation.

Performance:

No change to the basic flight manual.

Weight and Balance:

Refer to the basic flight manual for the actual W&B record.

System Description:

Relate to the applicable KTR2 VFR Communication Transceiver Operation and Installation Manual, Doc. No. DE-3000-800100e for a System Description.

Airplane Handling, Servicing and Maintenance:

The KTR2 system requires no regular maintenance. The system is "on condition".
